

The **84** ADVANTAGE

#1 choice of growers for over 19 years.

Maximize your benefits and minimize your risks
for all the Proven Winners® crops you grow with 84 plugs.

BENEFITS of using 84 plugs

- Crops grown from 84 plugs produce a finished crop of equal or better quality in 1-2 weeks less than a crop grown from a smaller, younger, less developed plug
- 84 plugs give you consistent quality from liner through finished crop
- Compared to smaller liners 84 plugs are a more mature plant with a well developed root system
- The spacing of an 84-tray allows for greater air movement and reduced disease issues
- Most 84 plugs are pinched to produce a fuller, well-branched finished crop
- Improved finished crop quality means increased sell-thru and more profit per square foot for you
- 84 plugs and crops grown from 84 plugs are grower-friendly if holding on the bench is needed

Take advantage of **THE BEST** Proven Winners®
availability in the industry with **FOUR STAR**.

Give us a call to see how we can save you on shipping and liner costs.
