

Standard Liners for Small Pots 2009-2010

Updated: June 12, 2009

Many Standard Liners work very well in small containers, we created this page to offer you our recommendations.

ABOUT FOUR STAR STANDARD LINERS

Standard Liners Work Well In Small Containers for Many Plants

Many plants work great in 4.50 **Classic**™ and 1.0 GL **Royale**™ branded containers and we recommend Standard Liners which can be timed to finish right alongside the plants being grown from **Supernova**® 42 or **Supernova**® 84 Liners.

You'll notice that some of the plants listed below are also part of our **Supernova**® 28 and/or **Supernova**® 28 **Thriller**™ programs which would be too large of a plug for smaller containers, and have a different purpose. The list below is specific to smaller containers in which Standard Liners are your best option and also perform very well.

- Recommended for upright containers, hanging baskets, window boxes and other large size containers also
- Hand pinched and grown bright and cool to provide vigorous growth, full branching, and profuse blooming to achieve the size needed
- Based on experimentation with our own Garden Ready production and sales, Four Star recommends planning crops every two weeks throughout the season to provide continuous fresh product

RECOMMENDED STANDARD LINERS FOR SMALL CONTAINERS LISTING 2009-2010
